INTRODUCTION

This bibliography provides selected reports, maps and journal articles on the environmental geology of Santa Clara County, California. It is intended for the layperson or the scientist beginning a new project.

Call numbers given at the end of references are for the U.S. Geological Survey Library in Menlo Park, California. Please be aware that other libraries may use different numbers.

GEOLOGY

1. Armstrong, C.F., 1980, Environmental geologic analysis of the Tar Creek South study area, Santa Clara County, California, by the California Division of Mines and Geology: San Jose, Calif., Santa Clara County, 20 p. - (276) Ar57e
2. Armstrong, C.F., and Wagner, D.L., 1976, Environmental geologic analysis of the Diablo Range Study Area, southern Santa Clara County, California, prepared in cooperation with the County of Santa Clara: California Division of Mines and Geology Open-File Report 78-11SF 65 p., 3 maps. - (276) C4ofr no. 78-11SF
3. Atchley, F.W., and Dobbs, R.O., 1959, Engineering geology of Moffett Field and Coyote Hills, Santa Clara and Alameda Counties, California: Sunnyvale, Calif., John Blume & Associates, 25 p. - *203(276) At24e
4. Atchley, F.W., and Dobbs, R.O., 1960, Geological investigation of the Stanford two-mile linear accelerator site, final report, U.S. Atomic Energy Commission, Contract AT(04-3)-21, Project agreement no. 3: Stanford, Calif., W. W. Hansen Laboratories of Physics, M.L. report no. 682, [214] p. - 203(276) At24gs
5. Atchley, F.W., 1960, Preliminary geological investigations of the Sand Hill and Felt Lake linear accelerator sites, Stanford University: Sunnyvale, Calif., John A. Blume & Associates, 26 p. - 203(276) At24p
