INVENTORY OF PUBLIC WATER SUPPLIES IN ARKANSAS

By Nancy T. Baker, Carolyn A. Manning, and Elizabeth A. Beavers

ABSTRACT

This report contains information for 697 public water-supply systems in Arkansas. Ground water is the source of supply for 435 of these water systems, and surface water is the source of supply for 72 systems. Ground and surface water is the source of supply for 6 systems, and 184 systems purchase their water from other public suppliers. About 943,000 people are served by ground-water supplies, and 1,136,000 people are served by surface-water supplies. Public supply includes water withdrawn by public and private water suppliers and delivered to users that do not supply their own water. Public suppliers report water withdrawals and related data to the Arkansas Soil and Water Conservation Commission. The U.S. Geological Survey works in cooperation with the Arkansas Soil and Water Conservation Commission in the collection, management, and storage of data for all categories of water use. Information in this document is obtained from Arkansas Soil and Water Conservation Commission reports and from field investigations conducted by the U.S. Geological Survey.

INTRODUCTION

Public water supply in Arkansas includes water withdrawn for all uses by public and private water suppliers and delivered to users that do not supply their own water. Water suppliers provide water for a variety of uses, such as domestic, commercial, thermoelectric power, industrial, and public water use. Information for 697 public-supply systems was obtained from water withdrawal information reported to the Arkansas Soil and Water Conservation Commission (ASWCC) for 1989. The U.S. Geological Survey (USGS) works in cooperation with the ASWCC in the collection, management, and storage of data for all categories of water use. The information contained in this report includes data reported to the ASWCC by each public supplier, and supplemental well data (ground-water sites) and selected water-quality data collected by the USGS for a limited number of sites. The USGS also assisted in the determination of source aquifers for some ground-water supplied systems. Estimates of population served by each public supply system were obtained from Arkansas Department of Health records (H. E. Seifert, Arkansas Department of Health, 1990, written commun.).

Of the 697 public-supply systems reporting water use, ground water is the source of supply for 435 of these systems, and surface water is the source of supply for 72 systems. Ground and surface water is the source of supply for six systems. Of the systems reporting, 184 systems purchase their water from other public suppliers. About 943,000 people are served by ground-water supplies, and 1,136,000 people are served by surface-water supplies.

Every effort has been made to include information for all public water suppliers that serve over 25 people in the State of Arkansas (fig. 1). The amount and quality of water-use data and related information presented in this document for each public water supplier is dependent upon the information reported by the individual supplier to the ASWCC. Supplemental well information (for ground-water sites) and water-quality information is provided for those sites where the USGS has conducted field investigations.

Figure 1a.--Location of public water-supply systems in Arkansas. Map numbers refer to water systems listed in appendix A.

Figure 1b.--Location of public water-supply systems in Arkansas.
Map numbers refer to water systems listed in appendix A.

Figure 1c.--Location of public water-supply systems in Arkansas. Map numbers refer to water systems listed in appendix A.

ACKNOWLEDGMENTS

The authors express appreciation to Mr. Harold Seifert, Director, Division of Engineering, Arkansas Department of Health for providing the initial list and addresses of public suppliers in Arkansas, and for providing estimates of population served by each system.

PRESENTATION OF DATA

The information contained in this report is presented in five tables (located at end of report). The first two tables contain water-use and related data that were reported to the ASWCC for 1989 (tables 1 and 2). Table 3 contains supplemental well data collected by the USGS, and tables 4 and 5 contain supplemental water-quality data collected by the USGS.

Water-use data collected by the ASWCC are stored in the USGS's Site-Specific Water-Use Data System (SSWUDS). SSWUDS data are available for each public water-supply system, and in most cases, SSWUDS data also are available for the individual withdrawal points associated with each system. Table 1 provides basic system information such as: water-user ID number, water system name and address, county of operation, source of water (ground or surface water) and name of source (lake or stream name for surface water or primary source aquifer for ground water), 1989 withdrawal amounts, local population served, total population served, water-user ID numbers to whom water is sold, and the water-user ID numbers from which water is purchased. Population served data were obtained from Arkansas Department of Health records because population served data reported to the ASWCC does not adequately differentiate local population served by other water suppliers who purchase water from that system. Table 2 provides a general description of the withdrawal sites associated with each system and includes the following information: water-user ID number, withdrawal site ID number, water system name, latitude and longitude of withdrawal site, hydrologic unit code, source of water (ground or surface water) and name of source (lake or stream name for surface water or primary source aquifer for ground water), pump horsepower, pump power source, pump type, well diameter and depth (for ground water), and a local descriptive identifier. Water-user ID numbers and the associated water system name are listed alphabetically in appendix A and hydrologic unit codes are listed in appendix B.

In addition to water-use data stored in SSWUDS, the USGS stores ground water data in the Ground-Water Site Inventory (GWSI) data system, and water quality data in the Quality of Water (QW) data system for a limited number of sites where the USGS has conducted field investigations (tables 3-5). Although the site ID is the primary identifier between the SSWUDS, GWSI, and QW databases, the SSWUDS water-user ID and water system name have been included in tables 3 and 4 to aid in ease of comparison between the water-use data and the supplemental data. Table 3 provides supplemental data for a limited number of public-supply wells that have been investigated by the USGS. The information includes: the principal source aquifer geohydrologic unit, the altitude of land surface, the depth of the well, depth to the first opening, casing diameter, water level and date measured, discharge of the well, specific capacity of the well, and types of well logs available. Table 4 contains supplemental water-quality data for public supply wells and table 5 contains supplemental water-quality data for surface-water sites that are near public supply intakes. Figure 2 shows site locations of the surface-water quality stations listed in table 5. The U.S. Environmental Protection Agency's (1988) recommended Secondary Maximum Contaminant Levels (SMCLs) for drinking water are given below.

Figure 2.--Location of surface-water withdrawal sites and water-quality sampling sites.

Constituent or physical property	Secondary maximum contaminant level (milligrams per liter, except where noted)
Chloride	250
Color (platinum-cobalt units)	15
Dissolved solids	500
Fluoride	2.0
Iron	0.3
pH (standard units)	6.5-8.5

The U.S. Environmental Protection Agency has established SMCLs for contaminants that can adversely affect the odor or appearance of water and result in the discontinuation of use of the water. SMCLs are not health based and are not Federally enforceable rather are intended as guidelines for the States.

The following example can be used to illustrate the procedure for cross referencing information from tables 1-4 and the appendices. Appendix A contains an alphabetical listing of all public water-supply facilities in Arkansas. Appendix A also includes a map identification number (to be used with fig. 1) and a water-user ID. The water-user ID is used to cross reference tables 1 and 2. For example: to obtain information about the Huttig Waterworks, one could look at appendix A and find that the map ID is 294 (located on map 2 of fig. 1) and that the water-user ID is 30724. The entries in table 1 are arranged in numerical order, so system information for water-user 30724 is found by simply scanning the table for the appropriate water-user ID. If withdrawal-site data are desired, table 2 is referenced by using the water-user ID. Table 2 is also arranged in numerical order by the water-user ID; however, there may be several withdrawal sites associated with a single water-user ID. Huttig Waterworks has two withdrawal sites. Each withdrawal site has a unique site ID. Hydrologic unit codes (table 2) and their associated basin names are given in appendix B. Supplemental well information (table 3) and supplemental ground-water quality information (table 4) are referenced using the water-user ID and the site ID. Supplemental well information is available for both Huttig Waterworks sites, but supplemental ground-water quality information is only available for one site.

Appendix B.--Hydrologic unit codes and basin names for Arkansas

Hydrologic unit code	Basin name
08010100	Lower Mississippi-Memphis
08020100	Lower Mississippi-Helena
08020203	Lower St. Francis
08020204	Little River Ditches
08020205	L'Anguille
08020301	Lower White-Bayou Des Arc
08020302	Cache
08020303	Lower White
08020304	Big
08020401	Lower Arkansas
08020402	Bayou Meto
08030100	Lower Mississippi-Greenville
08040101	Ouachita Headwaters
08040102	Upper Ouachita
08040103	Little Missouri
08040201	Lower Ouachita-Smackover
08040202	Lower Ouachita-Bayou De Loutre
08040203	Upper Saline
08040204	Lower Saline
08040205	Bayou Bartholomew
08040206	Bayou D'Arbonne
08040207	Lower Ouachita
08050001	Boeuf
08050002	Bayou Macon
11010001	Beaver Reservoir
11010003	Bull Shoals Lake
11010004	Middle White
11010005	Buffalo
11010006	North Fork White
11010007	Upper Black
11010008	Current
11010009	Lower Black
11010010	Spring
11010011	Eleven Point
11010012	Strawberry
11010013	Upper White-Village
11010014	Little Red
11070206	Lake O' The Cherokees
11070208	Elk
11070209	Lower Neosho
11110103	Illinois
11110104	Robert S. Kerr Reservoir
11110105	Poteau
11110201	Frog-Mulberry
11110202	Dardanelle Reservoir
11110203	Lake Conway-Point Remove
11110204	Petit Jean
11110205	Cadron
11110206	Fourche La Fave
11110207	Lower Arkansas-Maumelle
11140105	Kiamichi
11140106	Pecan-Waterhole
11140108	Mountain Fork
11140109	Lower Little
11140201	Mckinney-Posten Bayous
11140203	Loggy Bayou
11140205	Bodcau Bayou
11140302	Lower Sulphur
11140304	Cross Bayou
