

LEGEND

- x Nonproducing well location
- Sedimentary Rocks at depths greater than 15,000 ft.

Scale 1:5,000,000

EXPLANATION

The 7669 wells plotted may have had gas or oil shows but were not economical to produce at the time they were drilled. The dry (nonproducing) well data was derived from Petroleum Information's Well History Control System files current to approximately June of 1991.
