ONSHORE OIL AND GAS
RESOURCE ASSESSMENT AREAS – ALASKA
1993
by G.L. Dolton, K.J. Bird, K.L. Varnes, and D.L. Gautier

EXPLANATION

Province boundary

2

Offshore boundary of State waters

This map is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards. Any use of trade, product, or firm names does not imply endorsement by the U.S. Government.

Regions and provinces were established to provide units for systematic appraisal of oil and gas reserves. Alaska is Region 1; the lower 48 States comprise Regions 2 through 8. The Regions
were established by the Secretary of the Interior, based primarily on geologic features. The provinces
were established in Alaska generally from latitude and longitude lines or Township and Range
boundaries; the seven provinces include only onshore areas and separate State waters. Note that province
and region boundaries have been changed from previous assessments and the provinces are shown in
red. The provinces do not include the offshore, which is shown in blue.
