note: COALREAP borehole UAJ-1, the Pakistan Mineral Development Corporation MT- series boreholes, and all mines shown on this map are within the Meting-Jhimpir coal field (shallow Sohri coal) and do not penetrate the Bara Formation. Data from these locations were implicitly used in the construction of the structure and overburden maps included in this report (Plates 2 and 13). See SanFilipo and others (1988) for data from these locations.

Base map metric grid digitally generated by USGS, Reston, Virginia. Data points located relative to grid from best available information. Latitude and longitude adjusted to grid from Survey of Pakistan 1:50,000 scale topographic maps on paper copy. Selected drainage and cultural features added later at USGS from same topographic maps and are shown for reference only.

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards, the North American Stratigraphic Code, or the Stratigraphic Code of Pakistan.
