

FIGURE 2a--Gravity, magnetic, and topography profile of line G3. Bouguer gravity anomalies reduced for a density of 2.00 g/cm³. Faults shown are from Scott and Bonk (1984). Midway Valley fault is from Lipman and McKay (1965). F, unnamed fault; MVF, Midway Valley fault; PCF, Paintbrush Canyon fault; YWF, Yucca Wash fault.

FIGURE 2b--Gravity, magnetic, and topography profile of line G2. Bouguer gravity anomalies reduced for a density of 2.00 g/cm³. Faults shown are from Scott and Bonk (1984). Midway Valley fault is from Lipman and McKay (1965). F, unnamed fault; MVF, Midway Valley fault; PCF, Paintbrush Canyon fault; YWF, Yucca Wash fault.

FIGURE 2c--Gravity, magnetic, and topography profile of line G1. Bouguer gravity anomalies reduced for a density of 2.00 g/cm³. Faults shown are from Scott and Bonk (1984). Midway Valley fault is from Lipman and McKay (1965). F, unnamed fault; MVF, Midway Valley fault; PCF, Paintbrush Canyon fault; YWF, Yucca Wash fault.

FIGURE 2d--Gravity, magnetic, and topography profile of line G4. Bouguer gravity anomalies reduced for a density of 2.00 g/cm³. Faults shown are from Scott and Bonk (1984). Midway Valley fault is from Lipman and McKay (1965). F, unnamed fault; MVF, Midway Valley fault; PCF, Paintbrush Canyon fault; YWF, Yucca Wash fault.

FIGURE 2e--Gravity, magnetic, and topography profile of line YA. Bouguer gravity anomalies reduced for a density of 2.00 g/cm³. Faults shown are from Scott and Bonk (1984). Midway Valley fault is from Lipman and McKay (1965). F, unnamed fault; MVF, Midway Valley fault; PCF, Paintbrush Canyon fault; YWF, Yucca Wash fault.
