PEAK VERTICAL GROUND MOTION
NORTHRIDGE EARTHQUAKE, Jan. 17, 1994

0.64 ○ Peak Ground Motion at Recording Station

Contour of Peak Ground Motion, Interval 0.1 g

Supplemental Contour, Interval 0.05 g

Contour of Distance from Mainshock Epicenter, Interval 25 km

- Quaternary Alluvium
- Plio–Quaternary Sediment
- Pliocene Sedimentary Rock
- Miocene Sedimentary Rock
- Tertiary and Cretaceous Sedimentary Rock
- Crystalline and Metamorphic Rock

Geology from Jennings, 1977, Geologic Map of California, 1:750,000

Strong motion stations maintained by CDMG (Shakel, et al., 1994), USC (Trifunac, et al., 1994), and USGS (Porcella, et al., 1994)

Digital compilation by C.M. Wentworth, R.D. Borcherdt, R.K. Mark, and D.M. Boore

U.S. GEOLOGICAL SURVEY OPEN–FILE REPORT 94–197: V 1.1
