

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards or with the North American Stratigraphic Code. Any use of trade, firm, or product names is for descriptive purposes only and does not imply endorsement by the U.S. Government.

Figure 3. - Map showing the thickness of basin fill for part of the upper San Pedro Valley. Thickness was computed by inversion of the residual gravity of figure 2 as described in the text, and assuming a negative density contrast for the basin fill of 0.4 g/cc. Contour interval is 0.1 km. Hachured contours indicate a closed relative thickness minimum and, therefore, a bedrock high. Scale 1:125,000.
