

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards or with the North American Stratigraphic Code. Any use of trade, firm, or product names is for descriptive purposes only and does not imply endorsement by the U.S. Government.

Figure 4. - Thickness of basin fill for part of the upper San Pedro Valley derived from the draft structure contour map prepared by the ADWR. The proposed bedrock high corresponds to the area of basin fill computed to be less than 0.1 km that extends east-northeast of Nicksville. Hachured contours indicate a closed relative thickness minimum. Contour interval is 0.1 km. Scale is 1:125,000.
