

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards or with the North American Stratigraphic Code. Any use of trade, firm, or product names is for descriptive purposes only and does not imply endorsement by the U.S. Government.

Figure 5. - Gravity anomaly map computed from the basin-fill thickness map of figure 4, assuming a negative density contrast of the basin fill of 0.4 g/cc. Contour interval is 1 mgal and hachured contours indicate a closed relative gravity minimum. Scale 1:125,000.
