Figure 6. Map showing approximate water-level changes in the Evangeline aquifer, Houston-Galveston region, Texas, 1995-96.

EXPLANATION

- Line of equal water-level change
  - Interval 10 feet

- Boundary of study area

- Well used for control
- Well with shade indicates 1996 water level at least 10 feet lower than 1995 water level
- Well with bar indicates 1996 water level at least 10 feet higher than 1995 water level

Note: In areas where data are sparse or nonexistent, locations of water-level changes on the map are approximations and trends inferred by communities of low relief from field water-level data. Not all well data for 1995 and 1996 are included in this map. Illminations and others, 1995, Ch. 16.
