

Magnetic declination is 16.5 degrees east of north

EXPLANATION
GEOLOGIC UNITS

- af Artificial fill
- Qbhm/af Estuarine deposits with areas of artificial fill
- Qbhm Estuarine deposits
- Qhay Latest Holocene alluvial deposits
- Qhay/Qhb Latest Holocene flood plain and basin deposits
- Qbs Holocene dune and beach sand
- Qhb Holocene basin deposits
- Qht Holocene terrace deposits
- Qhf Holocene fan deposits
- Qha Holocene alluvium, undifferentiated
- Qs Late Pleistocene to Holocene dune sands
- Qb Late Pleistocene to Holocene basin deposits
- Qt Late Pleistocene to Holocene terrace deposits
- Qf Late Pleistocene to Holocene fan deposits
- Qa Late Pleistocene to Holocene alluvium, undifferentiated
- Qp Late Pleistocene terrace deposits
- Qpf Late Pleistocene fan deposits
- Qpa Late Pleistocene alluvium, undifferentiated
- Qpm Late Pleistocene marine terrace deposits
- Qoa Early to middle Pleistocene alluvium
- Qom Early to middle Pleistocene marine terrace deposits
- br Pre-Quaternary deposits and bedrock. Includes Quaternary landslides

Notes:
1. See accompanying text for descriptions of units, methodology and references.
2. All contacts should be considered approximate. This map was prepared by interpretation of aerial photographs and topographic maps, compilation of previous geologic and soil mapping. (See accompanying text for sources.) and limited field checking. Many areas were not field checked. Information on this map is not sufficient to serve as a substitute for geologic site investigation.

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards, or with the North American Stratigraphic Code. Any use of trade, product, or firm names is for descriptive purposes only and does not imply endorsement by the U.S. Government.
This database, identified as "Quaternary Geology, Napa, California 1:100,000 Quaternary Geologic Digital Database", was approved for release and publication by the Director of the USGS, although this database has been subject to rigorous review and is substantially complete, pursuant to further analysis and review. Furthermore, it is released on the condition that neither the USGS nor the United States Government may be held liable for any damages resulting from its authorized or unauthorized use.

Base scanned from U.S. Geological Survey 1:100,000 Napa, California topographic maps, 1978 editions.
Universal Transverse Mercator projection, zone 10
This map is a plot derived from data contained in the digital database Open-File Report 98-XX, "Quaternary Geology, Napa, California 1:100,000 Quadrangle: A Digital Database". A PostScript plot file of this map is included in the Open-File Report, but the Open-File Report does not contain a complete explanation of the database and indicating how to obtain the data from which this map was prepared as well as the PostScript plot file of the map. The pamphlet also explains how those without computers can obtain a plot of this map from a graphic vendor.
