

23—MISCELLANEOUS UPLIFT AND COLLAPSE FEATURES

[Symbols for miscellaneous uplift and collapse features are usually reserved for maps at scales of 1:250,000 or smaller]

REF NO	DESCRIPTION	SYMBOL	CARTOGRAPHIC SPECIFICATIONS	NOTES ON USAGE
23.1	Outline of metamorphic core complex—Certain		line weight .25 mm 5.25 mm .75 mm hachure line weight .175 mm	Hachures point toward downdropped body.
23.2	Outline of metamorphic core complex—Approximately located		5.0 mm ← H-8 1.0 mm	
23.3	Outline of metamorphic core complex—Approximately located, queried			
23.4	Collapse structure or sinkhole		all line weights .15 mm hachure height .55 mm; spacing 1.25 mm	Hachures point into sinkhole.
23.5	Crater outline, unspecified origin		line weight .15 mm dash 1.25 mm; space .375 mm	
23.6	Uplift—Local, intensely disturbed		circle diameter 2.5 mm; line weight .25 mm crossbar line weight .175 mm	
23.7	Salt dome		dot diameter 1.625 mm ← H-7	
23.8	Possible salt dome		line weight .275 mm circle diameter 1.625 mm	
23.9	Salt and (or) shale diapirs		100% black
