

June 27, 1992

Figure 8. Map showing areal distribution of the June 27, 1992, tephra-fall deposit. Field numbers (Table 1) have been reassigned, for the presentation on the map, as numbered points that increase with distance from the volcano. The points mark stations where mass-per-unit-area (MPUA) samples and other observations were collected; the data are presented in Table 1.
