

Figure 32. Distribution of pebbles of various size in lower conglomerate of Pennsylvanian and Permian Strathearn Formation (blue pattern) in Beaver Peak and Northwestern areas, Beaver Peak quadrangle, Nev. Sample-site localities are shown by black dots numbered with indices of median chert pebble length (A) in mm in brackets; possible contours of median pebble length are dashed lines. Thin gray lines express some geologic boundaries and faults from figure 4. Bedding attitudes in Strathearn shown on figure 4.
