

Core B5C5 was taken on June 19, 1996 in 26 meters of water. The core measured 58.3 cm in length, was x-rayed on June 25, 1996 and was subsampled on March 28, 1997 at 0.5 cm intervals down the whole core. Features noted are seen in the x-ray, water content, and texture profiles above and include sand and mud ribbons, mottled sediment, gas cracks, and some biological features including worm tubes.
