Figure 8. Map showing approximate water-level changes in the Evangeline aquifer, Houston-Galveston region, Texas, 1977–2002.

Note: The change map was generated by mathematically subtracting a gridded surface of the 1977 water-level-altitude map (Gabrysch, 1979), supplemented by additional 1977 water levels, from a gridded surface of the year's water-level-altitude map and then contouring the resultant gridded surface. Data points (in which water-level measurements were made) used to construct the two water-level-altitude maps are shown on those maps, respectively.

Approximate water-level changes, Evangeline aquifer, 1977–2002—Sheet 8 of 15
