Figure 6. Map showing approximate water-level altitudes in the Evangeline aquifer, Houston-Galveston region, Texas, January–February 2002.

Approximate water-level altitudes, Evangeline aquifer, 2002—SHEET 6 OF 15

In cooperation with the Harris-Galveston Coastal Subsidence District, City of Houston, and Fort Bend Subsidence District

Water-level contour—Shows altitude at which water level would have stood in tightly cased well. Contour interval 50 feet. Datum is sea level

Boundary of study area

Updip limit of Evangeline aquifer (Baker, 1979)

Data point—Well in which water-level measurement was made. Number is water-level altitude (shown where data too sparse for contours). One point can represent more than one well

Water-level changes in the Chicot, Evangeline, and Jasper aquifers and compaction 1973–2001 in the Chicot and Evangeline aquifers, Houston-Galveston region, Texas
