

### Surfzone Samples that Exceeded AB411 Single Sample Criteria and Events

**Figure 3-13.** The vertical bars indicate days on which bacterial events occurred, blue=type 1, magenta=type 2, gray=types 1 and 2, gold= type 3. Sea level measured at Los Angeles is shown at the bottom of the figure. A black dot is plotted at each time and location a sample was taken. Colored symbols are plotted at the time and location of samples exceeding AB411 single-sample standards. The size of the symbol is proportional to the ratio of the measured bacterial concentration to the AB411 criteria. The symbol size for a sample equal to the AB411 criteria is shown to the right of the indicator species in the legend.
