

Figure 6-9. 3-HLP time series, for analysis periods 3 and 4, of the offshore distance from HB01 along the main transect of the indicated isotherms where they intersect the bed. No line indicates the isotherm has surfaced. The middle panel is sea-level (bottom pressure) from HB07, and the top panel the along- (solid line) and across-shelf (red line shaded) wind components from HB07. Ticks on the time axis are at 0000 GMT for each day.
