This map shows the location of various types of geologic and geophysical observation points on the El Casco geologic map. The map includes 73 outcrop stations, 116 boring locations, 99 seismic lines, and 25 other points of interest. The data points were collected by various organizations, including the U.S. Geological Survey, the California Geological Survey, and the California Department of Transportation. The map is intended to provide a general overview of the geology of the area, and it is not scaled to true proportions. Users should refer to the legend for specific information on the various symbols used. The map is based on 1:24,000-scale geologic and geophysical data, as well as additional information provided by various agencies. The map was prepared in cooperation with the California Geological Survey and the U.S. Geological Survey. The map is licensed under the Creative Commons Attribution-ShareAlike 3.0 Unported License.
