

Appendix 3. Hydrograph for groundwater monitoring well GWM 128 modified from Danish Committee for Aid to Afghan Refugees (2011).

GWM_ID	128	Well type	Latitude	34.19126
District	Muhammad Agha		Longitude	69.08307
Place	Surkh Abad	Organisation in charge of the measurement		
Method	manual (with modified well)	DACAAR		

#### EXPLANATION

+++++ depth to water (m) below ground surface – right vertical axis  
 \_\_\_\_\_ groundwater specific conductance (µS/cm) – left vertical axis

The horizontal axis on the hydrograph is the date given as week number and year (for example, 18 '07 is week number 18 in 2007). The left vertical axis is the groundwater specific conductance in microsiemens per centimeter (µS/cm) and the right vertical is the depth to water in meters (m) below ground surface (bgs). The date 2 '11 is not correct.
