

GRIDS\USGS FOLDER CONTENTS

These grids have been created by the USGS from the flight line data.

Primary File Name	Description
BirdAlt	HEM bird altitude
MAG_HG	Total magnetic field, horizontal gradient
MAG_TMI	Total magnetic field intensity
PLC	Powerline channel
RES_400	Apparent resistivity at 400 Hz
RES_1500	Apparent resistivity at 1,500 Hz
RES_3300	Apparent resistivity at 3,300 Hz
RES_6200	Apparent resistivity at 6,200 Hz
RES_25K	Apparent resistivity at 25,000 Hz
RES_100K	Apparent resistivity at 100,000 Hz

Note: Each file name has several associated file extensions (.gi, .xml, .grd) used by Geosoft Oasis montaj to display the grid file.

Primary file names with “_s” appended to the primary file name denote color-shaded relief grids.
