

[Sequence stratigraphic units and correlation are from Ponti and others (2007). Lithologies are indicated on the stratigraphic column by color (clay, green; silt brown; sand yellow) (Ponti and others, 2007)]

EXPLANATION

- | | | | | |
|----|-------------|-----------------------------|------|---|
| N | Neritic | Depth based on microfossils | LBPF | Long Beach Pier F core site and monitoring well, Long Beach, California |
| OS | Outer shelf | Depth based on macrofossils | LBPC | Long Beach Pier C core site and monitoring well, Long Beach, California |
| US | Upper slope | Barren | LBCH | Long Beach Cabrillo High School core site and monitoring well, Long Beach, California |
| | | W Warm interval | LWEB | Long Beach Webster School core site and monitoring well, Long Beach, California |
| | | T Transitional | LBCC | Long Beach City College core site and monitoring well, Long Beach, California |
| | | C Cold interval | PCH | Pacific Coast Highway Fault |

Summary of the Paleoecologic Interpretations of the FOQUS-LA Wells Obtained From the Micro- and Macrofossil Analysis

By
Kristin McDougall, John Hillhouse, Charles Powell, II, Shannon Mahan, Elmira Wan, and Andrei M. Sarna-Wojcicki
2012

Any use of trade, product, or firm names in this publication is for descriptive purposes only and does not imply endorsement by the U.S. Government.
This map was printed on an electronic plotter directly from digital files. Dimensional calibration may vary between electronic plotters and between X and Y directions on the same plotter, and paper may change size due to atmospheric conditions; therefore, scale and proportions may not be true on plots of this map.
