

Table with columns for Stratigraphic unit, Laboratory numbers, Depth in meters, and various foraminiferal species names. The table is organized into sections for Harbor, Bent Spring, upper Wilmington, lower Wilmington, upper Long Beach, middle Long Beach, and Venturian. It lists species like Globobulimina ovata, Elphidium maculosum, and others across different depths and units.

[Abundances indicate the percentage of the total benthic foraminiferal fauna or absent (-)]

Distribution of Benthic Foraminifers in the Long Beach Pier C Core Site and Monitoring Well, Long Beach, California

By Kristin McDougall, John Hillhouse, Charles Powell, II, Shannon Mahan, Elmira Wan, and Andrei M. Sarna-Wojcicki 2012
