

*Data gathered 1961 with C. Wentworth
1962 with Clark Blake*

- Both
- Oriented pyroxene or olivine lenses
 - Compositional layering
 - Joints
 - Shears or shear zone.
 - Plunge of chromite lines
(Point is at point of measurement)

of2012-1164_plate
Full-scale version of figure 7, USGS Open-File Report 2012-1164.
See caption of that figure for description of this map.
The original of this map consists of four trimmed segments of
paper quadrangles, taped together and often folded along those
joins. Although the nominal scale is 1:24,000, distortions and
misfits are present in this reassembled composite.
