

### F 3343 – Azraq oasis area

Well F 3343 “ELIAS BATTIKHA” is located in the western part of the Azraq oasis area. The fit linear trend is  $+219 \mu\text{S}/\text{cm}/\text{yr}$  ( $R^2=0.37$ ). The trend is very steep, but the scatter in the six data points is substantial. The sampling period is also short, only 2002 – 2007. Additional data after 2007 could clarify the current trend at this location.
