

## AL1495 – Eastern part of basin

Well AL1495 “WADI DAFYANEH (KM 103)” is located in the eastern part of the basin where pumping is distributed and substantial. This well is the closest to the Corridor wellfield, of the wells analyzed. The fit linear trend is  $+10.4 \mu\text{S}/\text{cm}/\text{yr}$  ( $R^2=0.87$ ). The data are sparse with only 2 measurements after 1991. Data variability was small during the initial sampling period, 1986-91, but the last 2 values are more variable. Future measurements could clarify the EC and EC trend.
