

**EXPLANATION**

- 850 ▲ Gold content, where known (mg/m<sup>3</sup>), measured at placer concentration sampling point
  - Gold content measured in seam, up to 3,400 mg/m<sup>3</sup>
  - Secondary road
  - ▨ Agriculture
  - Populated area
- Gold content (mg/m<sup>3</sup>) derived from borehole sampling data
  - 1–100
  - 100–175
  - 175–300
  - 300–700
  - 700–1,700

**Figure 4.** Map showing the Nooraba placer deposit and the locations of previous sampling investigations.
