

Multielement Geochemistry of Rocks and Unconsolidated Materials — Phosphorus, Uranium, Vanadium

### Explanation

- Country boundary
- Railroad
- Road - major
- Road - arterial
- Road - minor
- Stream - permanent
- Stream - intermittent
- Major cities
- Productive water source

  

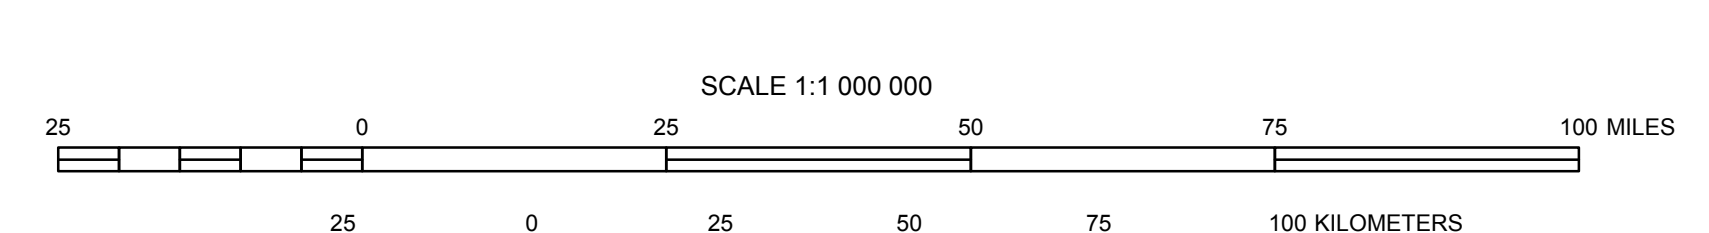

#### GEOCHEMISTRY EXPLANATION

Geochemical Areas	Anomalous P + U + V
Nord-ouest	P > 2 SD
Nord-est	U > 2 SD
Tasiast-Tijirit	P, U each > 2 SD
Central Mauritanides	V > 2 SD
Southern Mauritanides	P, V each > 2 SD
Kiffa-Néma	U, V each > 2 SD
Sample site	P, U, V each > 2 SD

The data used for processing are derived from different media; normalized Z-score data is the data that has been used; the data has been interpolated using inverse distance weighting.

Areas are geologically-based statistical domains used in processing the data.

This map was produced as part of the "Second Projet de Renforcement Institutionnel du Secteur Minier (PRISM II)" co-financed by the Government of Mauritania and the World Bank (Credit No. IDA-38100 MAU).
