The data used for processing are derived from different media; normalized Z-score data is the data that has been used; the data has been interpolated using inverse distance weighting.

Areas are geologically-based statistical domains used in processing the data.

This map was produced as part of the "Second Projet de Renforcement Institutionnel du Secteur Minier (PRISM II)" co-financed by the Government of Mauritania and the World Bank (Credit No. IDA-38100 MAU).
