

### North Piment Pit

- undisturbed regolith above ore
- hanging wall disseminated alteration and mineralization
- high-grade sheared ore (selvage)
- late sericite cross-cutting veins in high-grade ore zone (+ tr. kaol.)

### Sud-Sud Pit

- high-grade sheared ore (kaol., trace sericite, goethite, amphibole/chlorite[?])
- argillized footwall felsite (kaol., goethite, Mn dendrites, amphibole/chlorite[?])
