Figure 1. This shaded-relief bathymetry map of the Offshore of San Francisco map area in northern California was created in 2015 with data from CSUMB, Fugro Pelagos, and Earth Eye.

EXPLANATION

- Shaded-relief Bathymetry
- Electronically Enhanced Backshore
- The shaded-relief imaging algorithm used is for illustrative purposes only; actual illumination from the false sun is at 300° azimuth, 45° above the horizon. The area near the shoreline is in shadow (facing away from the false sun).
