

Coastline for U.S. Virgin Islands from National Hydrography Dataset. Remaining coastlines from compiled geologic maps (18K WGS84)

APPROXIMATE MEAN DECLINATION, 2019

SCALE 1:300,000  
NATIONAL GEODETIC VERTICAL DATUM OF 1988

UNITED STATES  
GULF OF MEXICO  
PACIFIC OCEAN  
MAP LOCATION

The geologic data shown on this map is derived from mapping published as early as 1926 and as recently as 2002. The largely nondigital source maps were digitized and the map units of each source were integrated across the region by the compilers.  
GIS database and digital cartography by F.H. Wilson and Keith Labay  
Manuscript approved for publication April 4, 2019

## Preliminary Geologic Map of Puerto Rico and the Virgin Islands

Compiled by  
Frederic H. Wilson, Greta Orris, and Floyd Gray  
2019

Any use of trade, product, or firm names in this publication is for descriptive purposes only and does not imply endorsement by the U.S. Government.  
This map or plate is offered as an online-only, digital publication. Users should be aware that, because of differences in rendering processes and pixel resolution, some slight distortion of scale may occur when viewing it on a computer screen or when printing it on an electronic tablet, even when it is viewed or printed at its intended publication scale.
