

EXPLANATION

- Lithologic correlation based on geophysical logs, Pottsville Formation
- Lithologic correlation based on geophysical logs, Mauch Chunk Formation
- Fault, inferred; arrows show direction of displacement; ? indicates uncertainty of location and movement
- Gamma log, intensity increases to right
- Single-point resistance log, resistance increases to right
- Density log, density increases to right
- Coal bed interpreted from density log
- Well nest or cluster, with identifier; screen interval identifier in italics
- Screened or open interval

Section A-A' with geophysical log correlations, Valmont TCE Superfund Site, Luzerne County, Pennsylvania
