Lithologic correlation based on geophysical logs
Reported bottom of overburden, dashed where approximate
Fault, inferred

Gamma log, intensity increases to right
Coal bed interpreted from density log
Well nest or cluster, with identifier; screen interval identifier in italics

Screened or open interval with range of reported trichloroethene (TCE) concentration, in micrograms per liter (µg/L)

Reported water-level altitude, in feet above North American Vertical Datum of 1988 (nm, not measured)
Reported TCE concentration, in µg/L (ns, not sampled)

Generalized potentiometric surface contour, in feet above North American Vertical Datum of 1988 with identifier

Section B_d-B'_d detail with generalized potentiometric surfaces and trichloroethene concentrations, Valmont TCE Superfund Site, Luzerne County, Pennsylvania, February-March 2020
