Lithologic correlation based on geophysical logs
Gamma log, intensity increases to right
Reported bottom of overburden, dashed where approximate
Coal bed interpreted from density log
Well nest or cluster, with identifier; screen interval identifier in italics
Screened or open interval with range of reported trichloroethene (TCE) concentration, in micrograms per liter (µg/L)
Generalized potentiometric surface contour, in feet above North American Vertical Datum of 1988 with identifier
Reported water level altitude, in feet above North American Vertical Datum of 1988
Reported TCE concentration, in µg/L

Section E-E’ with generalized potentiometric surfaces and trichloroethene concentrations, Valmont TCE Superfund Site, Luzerne County, Pennsylvania, February-March 2020
