ALBERT B. FALL, Secretary

UNITED STATES GEOLOGICAL SURVEY

GEORGE OTIS SMITH, Director

Professional Paper 128

SHORTER CONTRIBUTIONS TO
GENERAL GEOLOGY

1920

DAVID WHITE, CHIEF GEOLOGIST

WASHINGTON
GOVERNMENT PRINTING OFFICE
1921

CONTENTS.

[The letters in parentheses preceding the titles are those used to designate the papers for advance publication.]

	Page.
(A) The fauna of the Cannonball marine member of the Lance formation, by T. W. Stanton (published Aug. 11, 1920).....	1
(A) Corals from the Cannonball marine member of the Lance formation, by T. W. Vaughan (published Aug. 11, 1920).....	61
(B) Lower Miocene Foraminifera of Florida, by J. A. Cushman (published Aug. 12, 1920).....	67
(C) The origin of the faults, anticlines, and buried "granite ridge" of the northern part of the Mid-Continent oil and gas field, by A. E. Fath (published Aug. 13, 1920).....	75
(D) The use of geology on the western front, by A. H. Brooks (published Sept. 20, 1920).....	85
(E) American species of <i>Operculina</i> and <i>Heterostegina</i> and their faunal relations, by J. A. Cushman (published March 21, 1921).....	125
(E) A new species of <i>Orthophragmina</i> from Louisiana, by J. A. Cushman (published March 21, 1921).....	139
Index.....	143

ILLUSTRATIONS.

	Page.
PLATES I-IX. Fauna of the Cannonball marine member of the Lance formation.....	52-60
X. Corals of the Cannonball marine member of the Lance formation.....	66
XI. Lower Miocene Foraminifera of Florida.....	74
XII. Sketch map of a part of northeastern Oklahoma showing the distribution of en échelon faults, and, in Osage County, a predominant northerly alignment of the anticlines and domes.....	78
XIII. A flat mass of modeling clay pierced by several conical holes, before and after being deformed.....	80
XIV. Sketch map of eastern Kansas and northeastern Oklahoma showing distribution of "granite wells" and axes of several extensive anticlinal folds.....	82
XV. Military geologic map of Montsec, France, and vicinity.....	110
XVI. Military geologic map of Cirey, France, and vicinity.....	114
XVII. Generalized section of Commercy quadrangle, France, showing sequence of geologic formations and occurrence of water.....	116
XVIII-XIX. American species of <i>Operculina</i>	134, 135
XX-XXI. American species of <i>Operculina</i> and <i>Heterostegina</i>	136, 137
XXII. <i>Orthophragmina advena</i> Cushman, n. sp.....	142
FIGURE 1. Geologic map of part of western North and South Dakota.....	2
2. Sketch map showing position of marine Lance deposits with reference to Upper Cretaceous Pierre sea.....	16
3. Sketch map showing position of marine Lance deposits with reference to Eocene seas.....	17
4. A circle on a rubber eraser elongated by distorting the eraser.....	79
5. Diagrammatic sketch to illustrate normal faulting.....	79
6. Diagrammatic sketches illustrating progressive stages in the upward dissipation of a fault and its resolution into anticlinal folding.....	80
7. Diagrams illustrating geologic control of trench construction.....	101
8. Diagrammatic cross section of Moselle Valley near Pont-à-Mousson, France.....	102
9. Diagram showing control of depth of fieldworks by ground-water level.....	103
10. Diagram showing an igneous dike that prevents the advance of an attack gallery driven in soft sediments.....	106
11. Diagrammatic cross section showing a fault that prevents the advance of an attack gallery driven in beds of soft shale lying between beds of hard sandstone.....	107
12. Section in Woevre lowlands, Lorraine, showing underground conditions and entrance to cave shelter.....	108
13. Diagram showing location of mine gallery in dry ground between two water-bearing formations.....	109
14. Diagrams showing influence of geologic conditions on the presence of water in shell craters.....	112
15. Map showing water resources of Mamey, France, and vicinity.....	118
16. Map of Pettoncourt, France, and vicinity, showing developed water supply.....	118
