
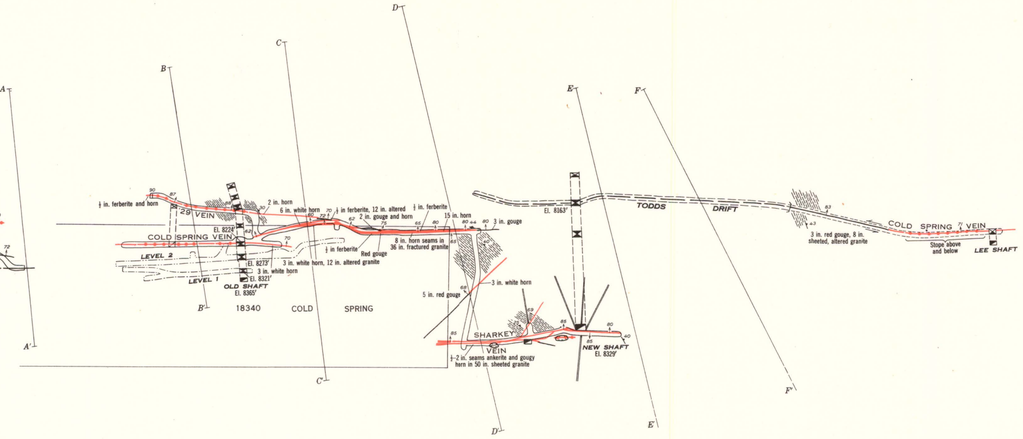
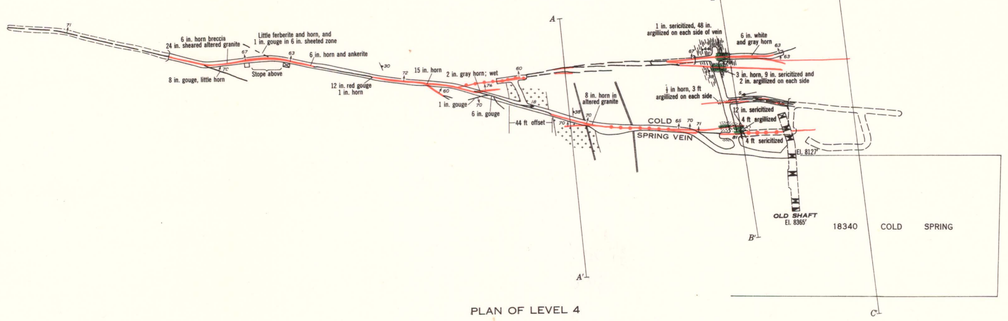
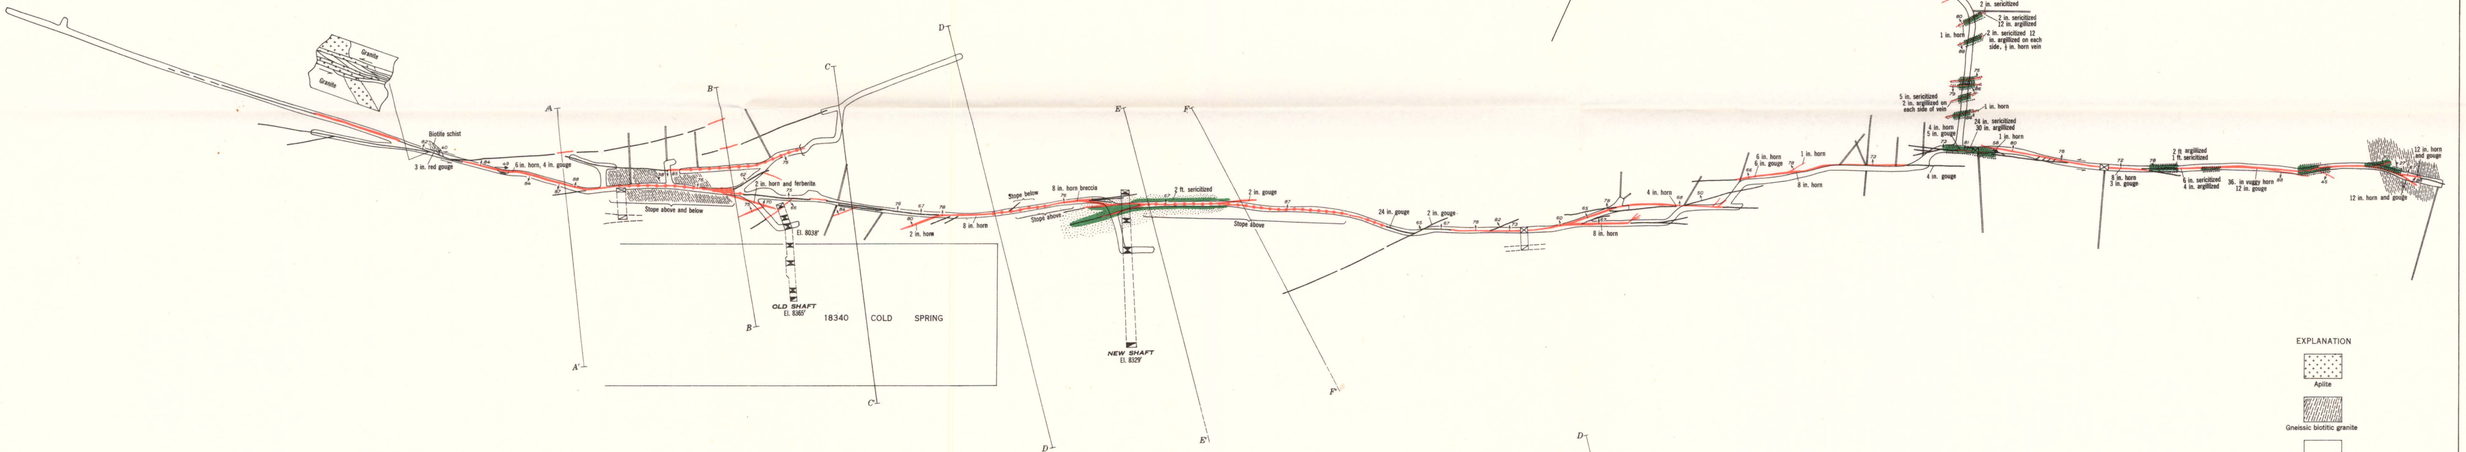
PLAN OF COLD SPRING NO. 4 MINE



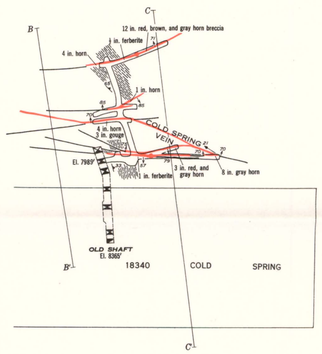
PLAN OF LEVEL 3



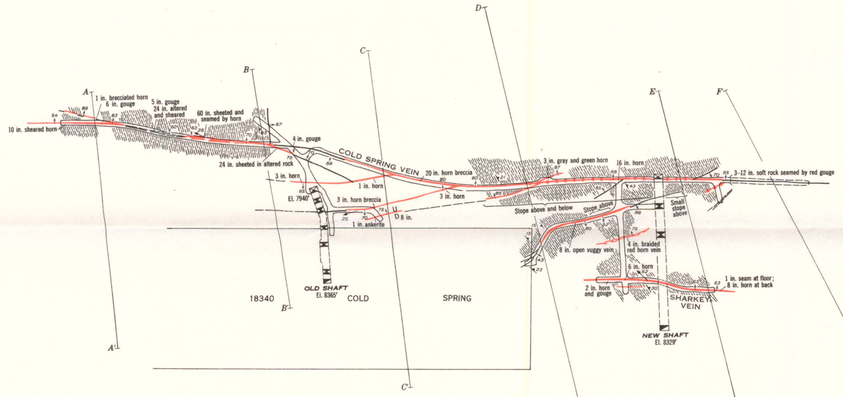
PLAN OF LEVEL 4



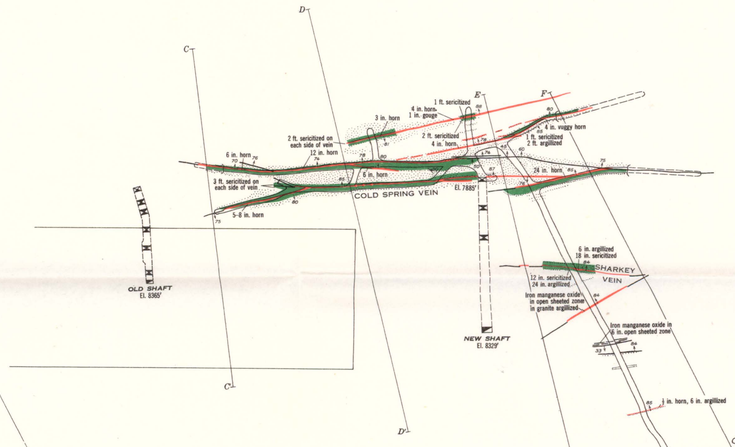
PLAN OF LEVEL 5

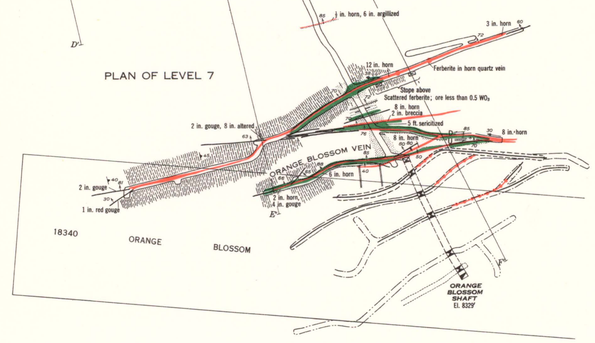


PLAN OF 5-50 SUBLEVEL

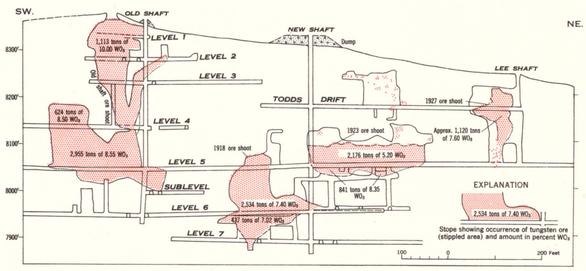


PLAN OF LEVEL 6





PLAN OF LEVEL 7



LONGITUDINAL PROJECTION OF THE COLD SPRING MINE

50 0 500 Feet

EXPLANATION

- Aplite
- Gneissic biotitic granite
- Granite
- Sericitic and siliceous alteration
- Argillic alteration
- Horn quartz vein, showing dip; dashed where approximately located
- Vertical vein
- Ferberite in vein (stoped)
- Barren fracture, showing dip
- Vertical fracture
- Vein or fracture showing relative movement, and bearing and plunge of slickensides. U, upthrown side; D, downthrown side
- Strike and dip of gneissic structure
- Sheeted zone
- Shaft at surface
- Shaft going above and below level
- Bottom of shaft
- Raise
- Winze
- Chute
- Open-cut
- Caved workings
- Diamond-drill hole
