

MAP OF THE MAIN SPODUMENE ZONE

- EXPLANATION**
- Dump
 - In section
 - Lamprophyre
 - Pseudo-leucite porphyry
 - Monzonite porphyry
 - Microcline-quartz pegmatite
 - Spodume-quartz pegmatite
 - Amblygonite pegmatite
 - Albite-quartz pegmatite
 - Oligoclase-quartz-muscovite pegmatite and pegmatite undivided
 - Hornblende and quartz-mica schist
 - Contact, showing dip
 - dashed where approximately located
 - Inferred contact
 - Contact between pegmatite units
 - Inferred contact between pegmatite units
 - Fault showing dip
 - Vertical fault
 - Strike and dip of foliation in schist
 - Strike and dip of foliation in pegmatite
 - Plunge of linear structure
 - Limit of underground workings
 - Inclined shaft
 - Foot of inclined shaft
 - Foot of raise
 - Rim of excavation
 - Dump

PLAN OF 60 LEVEL
Surveyed by tape and compass

Note: Lenticular outlines in sections are in part diagrammatic
