

TABLE 1.—Distribution of corals from drill holes on Eniwetok Atoll

Series..... Depth, in feet.....	POST-MIOCENE												MIOCENE										MIOCENE (?)										EOCENE	
	100	200	300	400	500	600	700	800	900	1,000	1,100	1,200	1,300	1,700	1,800	1,900	2,000	2,700	2,800	2,900	3,000	3,100	3,200	4,000	4,100									
<i>Plesiastrea</i> sp. cf. <i>P. versipora</i>	X																																	
<i>Tubipora musica</i>		X																																
<i>Seriatopora hystrix</i>		X	X	X																														
<i>Acropora</i> spp.....		X	X	X	X																													
<i>Distichopora fisheri</i>		X	X	X	X																													
<i>Astropora</i> sp.....		X																																
<i>Heliopora coerulea</i>			X	X																														
<i>Porites</i> sp.....			X	X																														
<i>Pavona</i> sp.....			X	X																														
<i>Galaxea</i> sp.....			X	X																														
<i>Stylophora pistillata</i>		X	X	X																														
<i>Montipora</i> sp.....		X	X	X																														
<i>Stylophora</i> sp.....			X	X																														
<i>Pocillopora</i> sp.....			X	X																														
<i>Acropora</i> sp. cf. <i>A. microphthalma</i>			X	X																														
<i>Seriatopora ornata</i>																																		
<i>Alveopora polyacantha</i>																																		
<i>Millepora</i> sp.....																																		
<i>Dictyariaea micrantha</i>																																		
<i>Acrhelia</i> sp.....																																		
<i>Actinastrea minutissima</i>																																		
<i>Seriatopora micrommata</i>																																		
<i>Pocillopora damicornis</i>																																		
<i>Stylocentella</i> sp.....																																		
<i>Porites</i> sp. cf. <i>P. capricornis</i>																																		
<i>Cyphastrea microphthalma</i>																																		
<i>Acropora humilis</i>																																		
<i>Cyloseris</i> sp.....																																		
<i>Dendracis pacificus</i>																																		
<i>Discothrochus</i> sp. cf. <i>D. orbignyianus</i>																																		
<i>Acanthophyllia</i> sp.....																																		
<i>Leptoseris</i> sp. cf. <i>L. floriformis</i>																																		
<i>Stylophora sokohensis</i>																																		
<i>Stylophora stellata</i>																																		
<i>Favia</i> sp. cf. <i>F. oligophylla</i>																																		
<i>Platygyra</i> sp.....
