EXPLANATION

- Structure contour
Drawn on top of the reef limestone. Dashed where inferred; queried where contour is extrapolated. Contour interval 100 feet; datum is mean sea level.
 - Area of poor control
 - Oil well in reef limestone
 - Oil well in reef limestone plugged back to produce from a higher zone
 - Dry hole in reef limestone
- Well data complete to October 18, 1954. Age of top of the reef limestone in individual wells indicated by a letter symbol: W, Wolfcamp age; C, Cisco age; Ca, Canyon age. Age determinations from fusulinids.*
- Line of section for plate 14
 - Line of section for plate 12
