EXPLANATION

1700
Contour line based upon bedrock exposures or subsurface data believed to be fairly accurate

1400
Contour line based upon subsurface data of varied reliability

2000
Contour line where little or no data are available and whose position is inferred

Note: Nearly entire area mantled with 50 to more than 250 feet of surficial deposits. Hence, contours may not everywhere reflect the presence of buried channels and other local irregularites

5 0 10 Miles

Contour interval 50 feet
Datum is mean sea level
