

EXPLANATION

PALEOZOIC

- pZd** Metadiorite
- X Location of smaller bodies indicated by X

PRECAMBRIAN

- pCo** Ocoee series
- pCb** Basement complex

Structural form lines on bedding

- Contact
- Major low-angle fault
Barb on upper side
- Other low-angle fault
T, on upper side
- High-angle reverse fault
U, upthrown side; D, downthrown side
- Transverse fault
Showing relative movement
- Major anticline
Approximate position of axis and direction of plunge
- Major syncline
Approximate position of axis and direction of plunge
- Strike and dip of slip cleavage or axial plane of second-generation fold
- Vertical slip cleavage or axial plane of second-generation fold
- Direction and amount of plunge of axis of second-generation fold in metasedimentary rocks; lineation in plutonic rocks
