

- EXPLANATION
-  **Bedrock**
 -  **Moraine**
Underlain by dead ice at least in part
 -  **Outwash**
 -  **Debris on active ice**
 -  **Contact**
 -  **Thrust fault dipping less than 45°, showing attitude**
 -  **Thrust fault dipping more than 45°, showing attitude**
 -  **Normal fault, showing attitude**
 -  **Crack with evidence of fault displacement of unknown direction, dipping less than 45°**
 -  **Crack with evidence of fault displacement of unknown direction, dipping more than 45°, showing attitude**
 -  **Crack with no apparent fault displacement, showing attitude**
 -  **Vertical fault or crack**
 -  **Attitude of moderately developed foliation**
 -  **Attitude of weakly developed foliation**
 -  **Attitude of very weakly developed foliation**
 -  **Transit point**
