

- EXPLANATION**
- Quartz-spodumene pegmatite  
*Core*
  - Quartz-muscovite-perthite-spodumene-cleavelandite pegmatite  
*Intermediate zone*
  - Perthite-plagioclase-quartz pegmatite  
*Intermediate zone*
  - Plagioclase-quartz-muscovite pegmatite  
*Wall zone*
  - Littleton formation (Lower Devonian); quartz-mica schist
  - Contact, showing dip  
*Dashed where inferred*
  - Contact between pegmatite zones or units  
*Dashed where inferred*
  - Limit of outcrop
  - Strike and dip of foliation
  - Strike of vertical foliation
  - Strike and dip of foliation and plunge of lineation
  - Plunge of roll
  - Rim of excavation
  - Dump

**GEOLOGIC MAP OF THE MC GALL MINE, RAYMOND, ROCKINGHAM COUNTY, NEW HAMPSHIRE**

INTERIOR—GEOLOGICAL SURVEY, WASHINGTON, D. C.—10087

Mapped by J. J. Page, L. F. Dellwig, and P. K. Brown, Jr., July 1949
