EXPLANATION

- Granite pegmatite
- Microcline-bearing gneiss
- Biotite-quartz-plagioclase gneiss
- Vein, showing dip  
Dashed where approximately located
- Vertical vein
- Contact  
Dashed where approximately located
- Barren fracture, showing dip
- Bearing and plunge of small drag-fold axis, showing dip of axial plane
- Bearing and plunge of warp axis
- Strike and dip of foliation
- Bearing and plunge of slickensides
- Strike and dip of foliation, and plunge of lineation
- Strike and dip of joints
- Strike of vertical joints
- Foot of raise
- Ore chute
- Lagging along drift or crosscut
- Inaccessible workings
- Filled workings
