

UNITED STATES DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY

EXPLANATION

Opencut

Opencut and beginning of adit

Edge of open pit

Roads

Dip-needle isoclinical contours
Contour interval 10°. Queried contour values represent numbers (angles) on magnetic map available for compilation.
Magnetic map represents distribution of magnetic material before stripping and mining. Culture, only key features of which are shown, is that of 1942.
Magnetic map is in part a reproduction and in part a compilation of data obtained by the Hanna Coal and Ore Corp.

MAGNETIC MAP OF THE CLIFTON MINE AND VICINITY, SOUTHEAST RECTANGLE, RUSSELL QUADRANGLE, ST. LAWRENCE COUNTY, NEW YORK
