GEOLOGIC MAP OF THE NEEDLES AREA, ARIZONA, CALIFORNIA, AND NEVADA

Scale 1:250,000

Credits: Prepared by G. E. Musser, 1961-64

GEOLOGICAL SURVEY (U.S.), 1964

Note: This map is a simplified representation of the geologic features of the Needles Area, including rock formations and mineral deposits. It is designed to provide a general overview of the geological conditions in the region.

Legend:
- Orange areas indicate sedimentary rocks.
- Blue areas represent igneous rocks.
- Green areas denote metamorphic rocks.
- Black lines indicate faults and fractures.

See figure 11 for additional details.

Issued by U.S. Geological Survey 1961-64
