

EXPLANATION

- Redskin Granite  
rfa, granite-aplite  
ru, granite undivided
- Pikes Peak Granite and older igneous and metamorphic rocks
- Contact
- Fault
- Shaft
- Adit
- Only mines and larger prospects shown*
- Vein  
G, with greisen walls; locally contains beryllium  
F, fluorite vein
- Greisen pipe
- Disseminated greisen
- Sample of surficial material  
10, beryllium, in parts per million  
15, beryllium in anomalous amounts equal to or greater than 15 ppm
- Area containing more than one sample with anomalous amount of beryllium
- Area of detailed geologic maps

Base from U.S. Geological Survey  
McCurdy Mountain and Tarryall,  
1:24,000, 1956
